

Retreat Homes & Lodges Limited

Retreat. Rodent resistant pipework, galvanised steel guttering, A+ rated kitchen appliances and, hidden behind the scenes, structural timber work set at 400 millimetre centres, all confirm the fact that Retreat builds properties that will stand the test of time.

Priding themselves on promptness and a high level of after care service, coupled with a Goldshield ten year extended warranty scheme, Retreat ensures you have confidence and peace of mind that your bespoke property will stay in great condition for decades to come. Build assurances also come in the guise of Retreat being a National Caravan Council (NCC) approved manufacturer. Here quarterly unannounced inspections by the NCC at Retreat's factory guarantee that your Retreat is delivered to you in perfect working order.

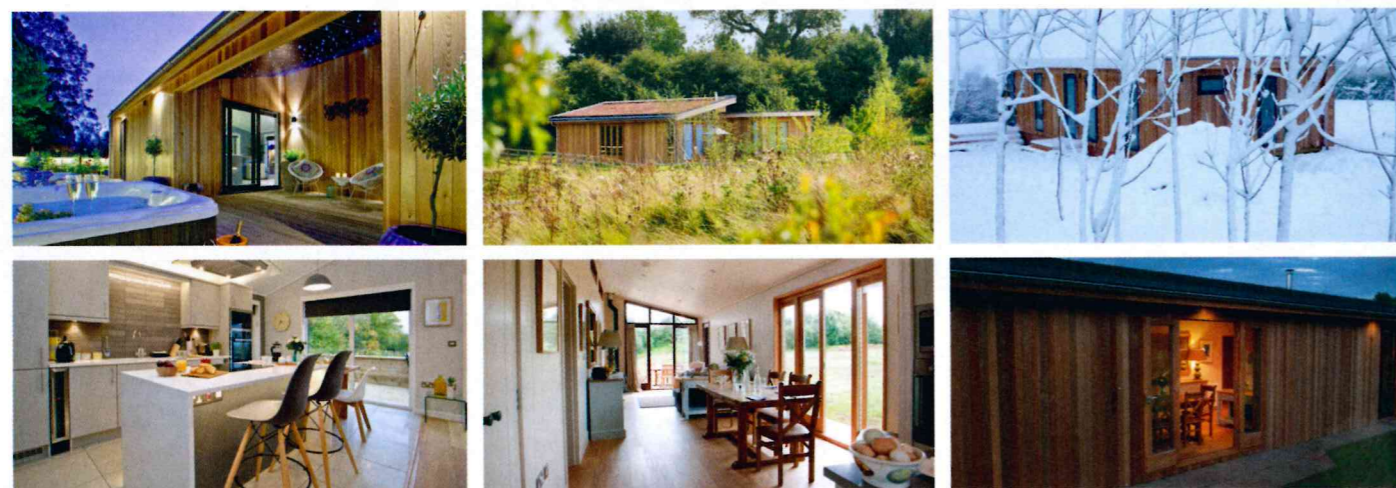

Being a small bespoke manufacturer means that Retreat can spend time handcrafting your perfect home to your exact specifications. However you will have to wait for the experience as currently Retreat's order book is very healthy.

Retreat, as is their annual tradition, will have an exhibition stand at the annual Scottish Caravan Motorhome and Holiday Home Show in Glasgow this coming February (8-11) at the SEC. Here you can have the opportunity to engage Retreat's knowledgeable staff on any aspect of their lodge manufacturing business and perhaps start on the first tentative steps of planning your very own grand design with the help of these experienced industry specialists that are maintaining their position as one of this industry's leading lights.

Nestled on the edge of a World Heritage site, the English Lake District in Cumbria, sits a unique and individual lodge manufacturing business, Retreat Homes and Lodges Limited. Here, with over fifty years in the industry, experienced designers and skilled craftsmen hand build bespoke lodges with thorough attention to detail and particular emphasis on the internal and external aesthetics, structure and environmental credentials. Built to exacting standards, each Retreat complies with BS3632:2015 Residential Park Homes & National Caravan Council Specifications.

Building Retreats for both the holiday park industry and for individual clients throughout the length and breadth of Britain, Retreat Homes and Lodges have gained a strong reputation in the industry for dynamic design with contemporary styling, featuring intricate architectural elements.

With current clients as far afield as Auchrannie on the Isle of Arran to Strawberryfield Park in Somerset, Fritton Lake Retreats in Norfolk across to The Plassey in North Wales, their designers invite clients to work in partnerships with them, often in the comfort of Retreat's purpose-made Specification Room in Cumbria, to ensure that their exact requirements are discussed, understood and incorporated into their dream accommodation. The Retreat philosophy is simple... quality design, quality build and quality finish. Whether you desire a Villeroy & Boch state-of-the-art bathroom suite, a green sedum roof or Perrin & Rowe antique satin brass taps for your kitchen, Retreat will deliver in style.

Retreats by virtue of their size and construction method fall within the Caravan Act and the benefits that infers. Furthermore, constructing homes in a factory gives Retreat the opportunity to negate the uncertainty and stress of traditional building and helps to produce high performance, low impact homes.

One stand-out characteristic that sets Retreat apart from any number of their lodge manufacturing contemporaries is their use of 18 millimetre untreated Western Red Cedar as their preferred external cladding. This natural and stunning material has the highest of environmental credentials and is often the first requirement on the wish list of Retreat's clientele when creating their own
